# Quality & Food Safety Policy

At KING FRUIT, fresh produce quality and safety, traceability and respect for workers are central priorities. We apply structured procedures to manage our products responsibly and continually improve our operations.

## IFS Food

We implement a Quality and Food Safety Management System in accordance with IFS Food for the sorting, packing and cold storage of fresh fruit, focusing on hygiene, quality control and continual improvement.

## GLOBALG.A.P. Chain of Custody

GLOBALG.A.P. Chain of Custody supports the handling, packing, distribution and trading of fresh fruit originating from GLOBALG.A.P.-certified production processes. For products within our certification scope, we apply supplier verification, product identification, segregation and traceability procedures to preserve their certified status throughout the supply chain. At primary production level, GLOBALG.A.P. Integrated Farm Assurance (IFA) includes requirements on food safety, environmental protection, and workers' health, safety and welfare.
